

Cake Size & Serving Guide

Not sure what size to order? Here's roughly how many people each cake feeds.

Single layer

Cake size(inches)	Serves (approx.)
4"	3 – 5 people
6"	6 – 10 people
8"	14 – 20 people
10"	22 – 30 people

Tall / double layer - most popular

Cake size(inches)	Serves (approx.)
4"	6 – 8 people
6"	12 – 15 people
8"	24 – 30 people
10"	38 – 46 people

Quick rule of thumb

- 4"** Small gift or a treat for two
- 6"** A small family
- 8"** The main party cake - feeds 24 – 30
- 10"** A big celebration - feeds 38 – 46

Ordering for around 20 people? Go for a tall 8-inch - it's our go-to party cake.

What a party slice looks like

This is roughly **one-party slice**. Our 'serves' numbers are based on generous slices about this size, from a tall, double-layer cake.

Cutting smaller 'finger' or wedding-style slices? The same cake will stretch to feed a few more.
